[African swine fever virus - Wikipedia](#)

African swine fever virus (ASFV) is the causative agent of African swine fever (ASF). The virus causes a haemorrhagic fever with high mortality rates in pigs, but persistently infects its natural hosts, warthogs, bushpigs, and soft ticks of the *Ornithodoros* genus, with no disease signs.

[Overview of African Swine Fever - Generalized Conditions ...](#)

African swine fever (ASF) is a highly contagious hemorrhagic disease of pigs that produces a wide range of clinical signs and lesions that closely resemble those of classical swine fever (see Classical Swine Fever). It is an economically important disease that is enzootic in many African countries.

[African Swine Fever Virus: A Review](#)

African swine fever (ASF) is a highly contagious viral disease of swine which causes high mortality, approaching 100%, in domestic pigs. ASF is caused by a large, double-stranded DNA virus, ASF virus (ASFV), which replicates predominantly in the cytoplasm of macrophages and is the only member of the *Asfarviridae* family, genus *Asfivirus*.
