[Aging brain - Wikipedia](#)

While much research has focused on diseases of aging, there are few informative studies on the molecular biology of the aging brain (usually spelled ageing brain in British English) in the absence of neurodegenerative disease or the neuropsychological profile of healthy older adults.

[Combating Age-Related Brain Deterioration - page 1 | Life ...](#)

Your brain begins to structurally deteriorate as early as age 30. Maintaining youthful cognitive function is a crucial challenge of aging. Declining memory function may also begin as early as age 30 and is often evident after 50 years of age.

[Ageing and the brain - PubMed Central \(PMC\)](#)

Physical changes. It has been widely found that the volume of the brain and/or its weight declines with age at a rate of around 5% per decade after age 40.1 with the actual rate of decline possibly increasing with age particularly over age 70. 2 The manner in which this occurs is less clear.
