[Human disease - Classifications of diseases | Britannica.com](#)

In the anatomic classification, disease is categorized by the specific organ or tissue affected; hence, heart disease, liver disease, and lung disease. Medical specialties such as cardiology are restricted to diseases of a single organ, in this case the heart. Such a classification has its greatest use in identifying the various kinds of disease that affect a particular organ. The heart is a

[Classification, Disease and Evidence - New Essays in the ...](#)

The book is divided into three sections: classification, disease and evidence. In general, attention is focused on statistics in medicine and epidemiology, issues in psychiatry and connecting medicine with evolutionary biology and genetics. Many authors position the theories that they address within their historical contexts.

[Classification of Plant Diseases | Botany - Biology Discussion](#)

According to symptoms diseases are often designated as blight disease, mildew disease, rust disease, smut disease, rots, cankers, etc. This system of classification gives an idea about the nature of damage done to the host and as such has some practical value.
