European Energy

European Energy builds solutions to climate change. We construct wind and solar farms as well as large-scale green energy storage. Our farms supply citizens and large corporations with green power, and secure a stable revenue to the institutional investors we are cooperating with.

Energy security - International Energy Agency

Energy security has many aspects: long-term energy security mainly deals with timely investments to supply energy in line with economic developments and environmental needs. On the other hand, short-term energy security focuses on the ability of the energy system to react promptly to sudden changes in the supply-demand balance.

European Commission | Energy

Projects of common interest (PCIs) are key energy infrastructure projects aimed at completing the European energy market in order to help the EU achieve its energy policy and climate objectives.
