[What is the AQL \(Acceptance Quality Limit\) in QC Inspections?](#)

AQL stands for Acceptance Quality Limit , and is defined as the quality level that is the worst tolerable in ISO 2859-1. It represents the maximum number of defective units, beyond which a batch is rejected. Importers usually set different AQLs for critical, major, and minor defects. Most Asian exporters are familiar with this type of setting. [AQL What is an Acceptable Quality level? - Camlab](#)  
[AQL What is an Acceptable Quality level? By John Spashett \(Technical Manager\) 1.](#) The problem was finally solved in the years between the Great War and the Second World War by statisticians working for the US Army. These statisticians were given the task of ensuring that any ammunition purchased by the army functioned as was intended. They rightly felt that the army would not accept their

[Acceptable Quality Level - AQL - Investopedia](#)

The acceptable quality level (AQL) is a statistical measurement of the maximum number of defective goods considered acceptable in a particular sample size. Goods in a sample are tested at random.

[Acceptable quality limit - Wikipedia](#)

The acceptable quality limit (AQL) is the worst tolerable process average (mean) in percentage or ratio that is still considered acceptable; that is, it is at an acceptable quality level. Closely related terms are the rejectable quality limit and rejectable quality level (RQL).

**Calgary, Alberta - Air Quality Health Index (AQHI) ...**  
You should limit the use of toxic paints, paint removers, stains, varnishes, waxes, glues, adhesives and cleaners on days when the air quality is high risk. The AQHI is an initiative of Environment Canada, Health Canada, Alberta Environment and Parks, Alberta Health and Alberta Health Services.

### Air Quality: Kelowna, British Columbia - The Weather Network

The Air Quality Health Index or "AQHI" is a scale designed to help you understand what the air quality around you means to your health. It is a health protection tool that is designed to help you [performancedesignlab.com](http://performancedesignlab.com)

Defining quality at the process level begins with identifying the end customer requirements for the process. These customer requirements must then be converted into specific measures that should drive one or more internal measures for the overall process. The measures should cascade throughout the subprocess and sub-subprocess levels. The result is a set of meters located at key junctures of
